

LAMMSCAPES!

UPDATE | March 30, 2020

As the world changes from day to day, **LAMMSCAPES!** is continuing to prepare for Spring in completely different ways than ever before!

We are committed to safety for our employees and customers and are taking preventative measures to reduce any risk of spreading the Coronavirus (COVID-19) in our community.

The landscape industry has been listed on the Essential Business List for snow and landscape services. It is an important time for cleaning up properties after winter, providing construction & water drainage control, as well as lawn and weed maintenance to prevent noxious weeds, rodent and insect damage & disease.

Our crews work in small numbers of 2 or 3 people, that regularly work at distances of greater than 6 feet away from each other. We work in the outdoors, and do not have physical contact with clients or enter their buildings. We already do and continue to practice safe, social distancing in accordance with CDC guidelines. Our trucks and facilities are cleaned daily, crews will travel with one person per vehicle.

Our landscape design team is continually creating projects for homes & businesses with online pictures and through outdoor visits. We are also able to communicate proposals, designs and scheduling via phone and online access.

Lamm Gardens, our retail garden center, will be scheduling delivery service and curbside pickup of bareroot trees, edible plants and garden items for April. Seminars originally scheduled will be presented online or rescheduled for a future date.

All our plants, as well as our planting workshops, are outside in the fresh air! Our Spring workshops are scheduled with many options for dates and times so we can limit them to under 10 people. Participants will be spaced out at tables for safety and detailed instruction. We recommend wearing gloves for planting and dressing for the weather.

We will clean & disinfect all surfaces of tables and garden tools used. Cleaning wipes and hand washing will be available for customers and employees. Payments can be done online at www.lammscape.com or over the phone prior to the workshop or plant purchase.

We can provide delivery and planting services also for items purchased. We will contact you regarding schedule for contracted landscape designs, planning and outdoor services.

*Please contact us by phone at (262) 677-3010 or visit our Contact Us page on www.lammscape.com to schedule or reschedule appointments and for answers to questions about our Spring services.

Though these days ahead can be uncertain and ever changing, we do remain certain that Spring will come, the flowers will bloom and we will put our faith in God, who is in control of it all. He will continue to guide our leaders, health workers and be with every one of us as we go through each day together. We believe in the hope of Spring and sunny days to come!

We encourage you to enjoy outdoor activities, such as planting and growing gardens with your family. Being outside is healthy, helps reduce germs and provides stress relief, relaxation & an appreciation of God's creation!

Thank you for your support of small businesses in our community! We look forward to helping your family this Spring!

~ The Lamm Family & Team
